-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

1. Claims 1-5 are rejected under 35 U.S.C. 102(e) as being anticipated by Glogovsky et al. (US 6,743,864.)

Glogovsky et al teach a polyolefin composition including 15-40wt% of a crystalline polypropylene, 60-85wt% of an elastomeric fraction such as ethylene-butene copolymer, both of which may be produced by metallocene catalysts, and up to 50wt% of conventional additives, wherein the polyolefin composition may be utilized to produce roofing membranes of 5 to 200 mils that may be scrim reinforced (See Abstract; Column 5; Column 7, lines 19-30; and Column 8, lines 14-60). With regards to the heat seam peel strength and cold brittleness point limitations, the Examiner takes the position that the membrane taught by Glogovsky et al. would inherently possess the same properties as instantly claimed given that the membrane taught by Glogovsky et al. and that of the claimed invention comprise the same materials. Furthermore, with regards to the limitation that the polyolefin has a molecular weight distribution (MWD) of about 2 to 2.5, the Examiner takes the position that polyolefins taught by Glogovsky et

al. must have the same molecular weight distribution given that both are prepared by the same process.

### ***Conclusion***

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sheeba Ahmed whose telephone number is (571)272-1504. The examiner can normally be reached on Monday-Friday from 9am to 5pm.
